

 <p>CRANE PUMPS & SYSTEMS</p>	<p>Full Line manufacturer of water and wastewater pumps. Brands include Barnes submersible pumps, Weinman splitcase pumps, Deming submersible and end suction pumps, Burke water pumps, and Crown self-priming pumps.</p>
 <p>BARNES <i>Submersibles</i></p>	<p>Barnes is a leading manufacturer of wastewater submersible pumps featuring solids handling, vortex, and chopper designs. The new Sithe™ oil cooled motor and Envie³ air cooled motor chopper pumps introduce a patent pending chopper system which can be retrofitted to existing Barnes solids handling pumps. The Plug and Play cable system allows for quick removal and maintenance without having to manually fish cables in the station.</p>
 <p>BARNES <i>Pressure Sewer</i></p>	<p>Introducing the full line of Razor™ low pressure pumps with multiple residential sewer applications. The Omni-Grind plus features two stage vortex pumping to provide high head coverage while also scouring the lines to avoid clogging. Complete line of retrofit pumps to drop into leading competitor's proprietary systems. Also provide design and layout for new complete systems and pre-packaged customized basin assemblies.</p>
 <p>IXOM WATERCARE</p>	<p>IXOM Watercare offers the Grid Bee™ low cost mixers for both wastewater and potable water. The AP500 mixer will mix and degrease wet wells up to 10ft diameter using a 1/2HP compressor. The GS series mixers will fully mix all types of water tanks up to 2 million gallons in size. Grid Bee is also a leader in THM removal systems offering a proven, guaranteed system. Also feature solutions for mixing Equalization basins cost-effectively as well as providing mixers for Blue-Green algae control.</p>
 <p>CASTAGRA Superior Sustainable Innovation</p>	<p>The Ecodur™ 201 coating system provides superior durability, UV protection, and H₂SF protection as epoxies and Polyurethanes. Its ability to go on in one coat with no primer drastically reduces the cost of coating projects. In addition it is totally green technology with no VOC's or petroleum solvents required.</p>
 <p>TITUS WASTEWATER SOLUTIONS MADE EASY</p>	<p>The Titus Twister provides chemical free mixing to combat the high levels of hydrogen sulfide (H₂S) gases, acids, and other chemicals produced from municipal and industrial wastewater. The Titus Twister's patented design incorporates air lift technology with specially designed HDPE blades, stainless components, high quality blowers, protective enclosures and optional ozone generators.</p>
 <p>Teekay the pipe coupling</p>	<p>Teekay produces high quality pipe couplings. Pipes can be joined without the need for flanging, grooving, threading, or welding. Teekay couplings save; weight, space, time, and money. <i>For pipe repair; two pipes, two screws, two minutes</i></p>
 <p>WASTECORP. Pumps</p>	<p>Leading Manufacturer of Sewage plunger style pumps. They also manufacture motor drive diaphragm pumps for a cost-effective sludge pumping option. Also manufacture a full line of wastewater self-primers from two inch to 12 inch, capacities to 5500GPM.</p>
 <p>FB PROCÉDÉS WASTEWATER SCREENS</p>	<p>FB Procédés has been operating since 1985 specializing in designing, manufacturing, and installing wastewater screens. FB Procédés designed, developed and optimized bar screening solutions that fully answer the needs of the industry.</p>
